

### Instructions for Applying the Vinyl Stickers

The first step is to identify all the vinyl pieces and locate their correct positions on your campervan.

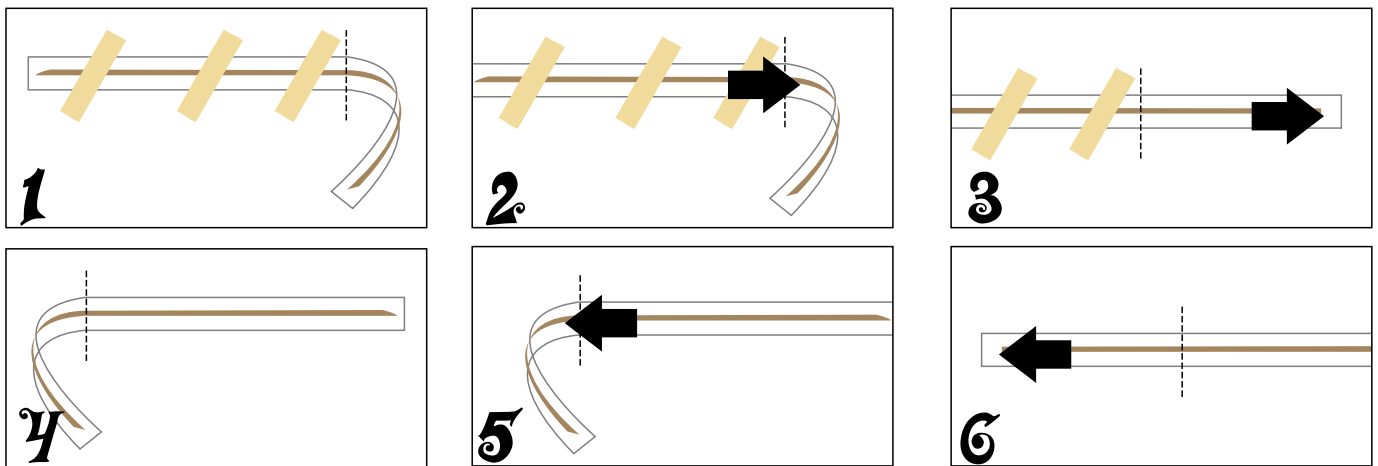

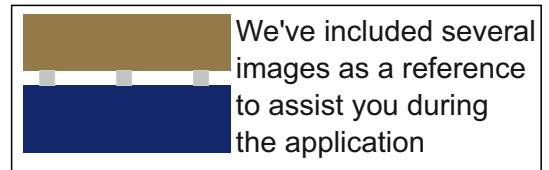

Attach the vinyl pieces to your van using masking tape. Make sure the overall layout matches the photo on page 2.

#### Applying the Golden Vinyl Pieces

Start by applying the golden vinyl pieces. Secure one vinyl piece with a few strips of masking tape (see image 1), leaving half of the vinyl strip free. Separate the white backing paper from this free end and cut it off.

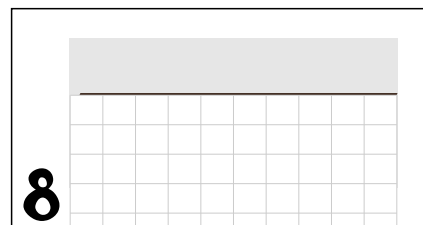

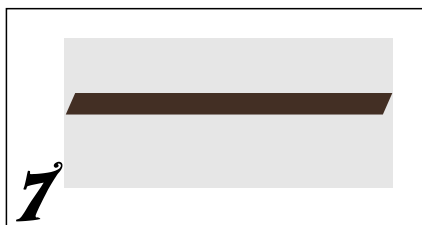

Carefully apply the vinyl by using a squeegee, gliding from the center to the end of the strip (see images 2 and 3). Remove all the masking tape, peel off the remaining white backing paper, and apply the rest of the vinyl as previously described.

Once the golden vinyl pieces are in place, attach some gray squares on top of the golden vinyl. These will serve as spacers.

#### Applying the Dark Blue Vinyl Pieces

1. Place a dark blue vinyl piece face down on a table large enough to prevent the vinyl from hanging over the edges.
2. Remove the white backing paper completely.
3. Reapply the backing paper by aligning its edge with the edge of the vinyl (see images 7 and 8).
4. Position the vinyl on the body of the van and adjust it until it perfectly lines up with the golden vinyl.

5. Once it is correctly aligned, remove the backing paper that you previously reapplied and carefully stick the vinyl onto your MB van.
6. Gently remove the transfer film (rub it lightly against the vehicle surface beforehand if necessary).
7. Remove the gray squares that were used as spacers.
8. Repeat this process until all the stripe pieces are applied.

#### Applying the Remaining Stickers

For the remaining stickers, use the same procedure as with the two-tone stripe, but apply them in a single piece, which makes the process easier. For larger pieces, be extra cautious about air bubbles. To avoid bubbles, glide the squeegee sideways over the vinyl, working step-by-step.
